Return on average assets	0.75 %	0.92 %
Operating expense ratio (excluding insurance fund premiums)	21.65 %	20.41 %

## MANAGEMENT COMMENTARY

“CoBank delivered solid business performance during the first quarter of 2025 despite significant stress and uncertainty in the macroeconomic environment, with strong growth in loans and net interest income. We continue to operate from a position of financial strength and remain committed to serving the financing needs of our customers.”

– *Thomas Halverson, CEO, CoBank*

“Though net income declined from the first quarter of 2024 primarily due to the bank’s provision for credit losses, pre-tax and pre-provision earnings for the first quarter of 2025 increased 12 percent year-over-year. Despite some credit deterioration, our core operating performance and capital position remain robust.”

– *Sean Burke, CFO, CoBank*

## HIGHLIGHTS

- Average loans increased 8% in Q1, compared to the same period in 2024. Loans outstanding totaled \$161.5 billion at March 31, 2025
  - Increase in year-over-year Q1 average loans across all three operating segments
- Net income in Q1 decreased 11% in 2025 to \$390 million compared to \$438 million in Q1 2024.
  - Decrease was primarily due to the provision for credit losses incurred during Q1 as compared to a credit loss reversal in Q1 2024 and higher operating expenses, partially offset by higher net interest income and noninterest income, as well as lower income taxes
- Net interest income in Q1 increased 9% to \$522 million from \$479 million in Q1 2024 primarily driven by higher average loans
- Net interest margin was flat at 1.02% in Q1 2025, compared to the same period in 2024
- Provision for credit losses in Q1 was \$77 million compared to a credit loss reversal of \$37 million for the same period in 2024
  - The higher provision in Q1 2025 primarily reflected deteriorating macroeconomic conditions and credit quality that resulted in higher modeled credit losses in many of our lending portfolios as well as increased lending activity. The credit loss reversal in Q1 2024 primarily reflected improved macroeconomic forecasts and their impact on our credit loss modeling
- Noninterest income increased \$30 million in Q1 compared to the same period in 2024 primarily due to a \$14 million return of excess insurance funds from the Farm Credit System Insurance Corporation, higher patronage income and loan-related fee income
- Operating expenses increased \$18 million in Q1 compared to Q1 2024, primarily driven by higher employee compensation, information services and Farm Credit Insurance Fund premium expenses
- Capital and liquidity levels remain strong and were in excess of regulatory minimums as of March 31, 2025
  - Total capital increased to \$13.0 billion from year end, primarily from a decrease in accumulated other comprehensive loss and current period earnings, partially offset by retirements of preferred stock and common stock, as well as patronage distributions
  - Total capital ratio was 13.55%, compared with the 8.0% minimum
  - 188 days of liquidity, compared with the 90-day minimum

## NET INTEREST INCOME AND NET INTEREST MARGIN

Net interest income increased \$43 million, or 9%, to \$522 million for the three months ended March 31, 2025, compared to \$479 million for the same period in 2024. The increase in net interest income was primarily driven by higher average loans mostly attributable to our Agribusiness operating segment which experienced an increase in seasonal lending to grain and farm supply cooperatives. Net interest margin was flat at 1.02% for the three months ended March 31, 2025 and 2024.

### Net Interest Margin and Net Interest Income

Three months ended	March 31, 2025			March 31, 2024		
	Average Balance	Average Rate	Interest Income/Expense	Average Balance	Average Rate	Interest Income/Expense
(\$ in millions)						
<b>Interest earning assets</b>

## CREDIT QUALITY

Notwithstanding some credit quality deterioration, our overall loan quality remains manageable at March 31, 2025. Special Mention loans were 1.26 percent of total loans at March 31, 2025 compared to 1.34 percent of total loans at December 31, 2024. The level of adversely classified loans (“Substandard”, “Doubtful” and “Loss”) as a percent of total loans increased to 1.04 percent at March 31, 2025 compared to 0.84 percent at December 31, 2024 primarily due to customers in our Agribusiness operating segment transferred to Substandard status. Nonaccrual loans, which are classified as Substandard and Doubtful loans, were 0.28 percent of total loans at March 31, 2025, compared to 0.24 percent at December 31, 2024. We believe credit quality deterioration in the future is possible due to market factors impacting our customers. Such factors include trade, tariff and economic uncertainty, an ongoing volatile agricultural commodity price environment, labor shortages, inflation, elevated level of interest rates, weather related events, as well as the war in Ukraine and instability in the Middle East. In addition, concentrations within our loan portfolio can cause the level of our loan quality, nonaccrual loans, charge-offs and provisions for credit losses or credit loss reversals to vary significantly from period to period.

## ABOUT COBANK

CoBank is a cooperative bank serving vital industries across rural America. The bank provides loans, leases, export financing and other financial services to agribusinesses and rural power, water and communications providers in all 50 states. The bank also provides wholesale loans and other financial services to affiliated Farm Credit associations serving more than 78,000 farmers, ranchers and other rural borrowers in 23 states around the country. CoBank is a member of the Farm Credit System, a nationwide network of banks and retail lending associations chartered to support the borrowing needs of U.S. agriculture, rural infrastructure and rural communities. Headquartered outside Denver, Colorado, CoBank serves customers from regional banking centers across the U.S. and also maintains an international representative office in Singapore.
